LET US "SHOW YOU THE MONEY"

Real Casino Sights, Sounds and Thrills

ETSI is the distributor of "click and play" casino games created in JAVA. They are so simple to play that anyone can play them. Click and play JAVA games means instant fun for online gamblers and instant revenue for the Entrepreneur/Casino Operator.

These games are user friendly, putting ETSI heads above competitors' software packages that use download versions of games.

State of the Art Data Base Management

Accountability gives you a handle on the day-to-day business operations. Your user name and password gives you access to a dynamic web page that displays for you the casino's financial parameters. Instantly, you will have access to vital information such as the number of hits, new accounts, new deposits, cash out requests or web master activity that has taken place. You have full access to data for your own casino, 24 hours a day.

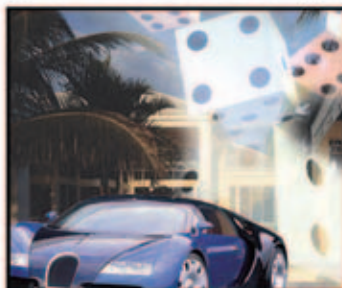

Bank Level Security Issues

Security issues are extremely important when it comes to E-Commerce transactions and gaming firewall architecture. ETSI's turn-key casino software employs 128 bit encryption/decryption to securely transmit data using proprietary security algorithms. This state of the art security protects all users of the software.

Capitalize on the E-Commerce Boom

As the number of Internet users grow, in the order of millions per year, there is a small window of opportunity for those confident enough to take a chance. Most certainly E-Commerce is the wave of the future. Couple that with the largest industry in the world, gambling, and now you have the potential for an exciting business opportunity.

A Driving Need to be a Winner

Gambling is the largest industry in the world. ETSI wants you, the Entrepreneur, to enter into and capitalize on this lucrative business.

Few industries are expected to experience the 10 fold growth over the next 5 years that experts are predicting with online gambling.

We have the turn-key solution that can work for you!

Instant Revenue to the Casino Owner

Your online Internet gambler does not need to be computer literate to play our games. There's no waiting for software downloads or CD Roms to arrive via the mail. The new client just clicks and plays. No hassles, no waiting. This means instant revenues for you, the Casino Owner.

Professional Products and Services

ETSI is committed to providing Entrepreneurs with:

1. Software rated as the BEST gaming software by many Major Casino Portals.
2. Over 4 years of gaming software research and development.
3. Professional Customer Support and Service.
4. Great games and great graphics that excite new and existing customers.

Consistently in the Top 10

Don't just take our word for how well our software works. Casino VR uses this same software and is consistently ranked in the Top 10 by Major Casino Portals worldwide. These Casino Portals come to the site and rate it based on the Variety of Games offered, Customer Service, Customer Support etc. This Software has been rated as "Five Star Software" time and time again by industry experts. Even Casino Portal Owners choose Our Software First when they want to Play for Real Money and Real Excitement.

Now this software is available for you to Own Your Own Casino. Contact us as soon as possible to get started!
